EDUCATION

- **Jawaharlal Nehru National College of Engineering.** Shimoga, India
  Bachelor's Degree in Computer Science. *August 2018 – 2022.*

EXPERIENCE

- **New East General Trading FZCO** **Dubai, UAE.**
  Senior Software Developer Engineer. *April 2025 – present.*
  - Coordinated the development of web and mobile applications using React, Next.js, Nest.js, and React Native, including an e-order platform with direct SAP integration that has been actively used by customers from more than 1 year and has generated more than AED 1.5 million in revenue to date.
  - Coordinated the development of an internal intranet application integrating Microsoft Teams API for scheduling and managing team meetings, Oracle APIs to implement organizational hierarchy and role-based task management, and an AI-powered policy assistant chatbot to help employees easily access company policies, along with features for approvals and internal announcements.
  - Experienced in AI/ML-driven frontend integrations, including building user interfaces for AI-powered tools, integrating with Large Language Model (LLM) APIs, and visualizing AI-generated outputs in real time.
  - Integrated DevOps practices seamlessly into the development lifecycle, leveraging strong Linux server and Docker expertise to ensure efficiency and reliability.
  - Managing and developing SAP HANA databases, including schema design and writing optimized SQL procedures to support business operations and reporting.
- **Zuno General Insurance Company Limited** **Mumbai, Maharashtra.**
  Software Developer Engineer. *Aug 2022 – April 2025.*
  - Implemented an Admin Dashboard using **React.js** (Next.js), HTML and CSS by integrating a User Role table to define and manage user roles like admin, customer, and agent.
  - User Interface Design: Focused on enhancing user interaction, experience and design patterns using React.js (Next.js) by designing intuitive interfaces for the renewal dashboard project.
  - Enhanced website UI, including design changes and new content integration in frontend. Have used Context API to pass props and have strong understanding of callback functions, Hooks, Routing and developing Single Page Applications.
  - Developed real-time PDF generation RESTful APIs using **Node.js** (Express.js) for insurance purchases and renewals, implementing efficient server-side logic and EJS templating, reducing processing time from 10-15 minutes to instantaneous delivery.
  - Authentication and Authorization: Developed secure **Log in** and **Dashboard RESTful APIs**, incorporating **JSON Web Token (JWT)** issuance and role-based access control for enhanced security.
  - Database Management: Efficiently managed PostgreSQL databases optimizing data retrieval and user validation processes.
- **WORKWISE.** *Remote*
  Web Developer, Freelance.
  - Developed a Technical Evaluation Feature in the website using React.js to streamline RFQ and product evaluation processes, implementing RESTful APIs with Node.js and Express.js for seamless backend integration.

SKILLS

- **Languages**: JavaScript, HTML, CSS, Python3, SQL, C++, Java.
- **Frameworks**: Next.JS, React.JS, Node.JS, Express.JS, Flask, Material UI.
- **Database and Platforms**: PostgreSQL, MySQL, MongoDB, Cassandra, Git, Postman
